PROFESSIONAL SUMMARY

M.Sc. student in Web Engineering at TU Chemnitz with 3+ years of professional experience in DevOps and Platform Engineering at A.P. Moller Maersk. Experienced in Python and Bash scripting, Linux, Docker, Kubernetes, CI/CD, log analysis and incident troubleshooting, REST API integrations and data synchronization between tools, and operating security tooling such as SonarQube (static code analysis) and Harbor. Experienced in following runbooks, documenting changes and handing over issues with diagnostic context. Built an open-source LangChain/RAG log-diagnosis tool that sanitizes secrets locally. Seeking a Working Student role in Security Tooling, DevOps or Platform Engineering.

SKILLS

Scripting & Programming: Python (scripting and automation), Bash, Git, Java, JavaScript, TypeScript, HTML, CSS

Systems & Tools: Linux Administration, Container Concepts, System Log Analysis, Incident Handling, Jira, Confluence, Agile/Scrum, macOS

Runbooks & Documentation: Runbooks, Technical Documentation, Known Issues Documentation, Change Documentation, Handover Notes

Integrations & APIs: REST APIs, API Integrations, Data Synchronization, GraphQL, JSON, YAML, Spring Boot, Temporal, Kafka, FastAPI, Node.js

Cloud & DevOps: Docker, Kubernetes, Helm, Flux, Harbor, GitHub Actions, Azure DevOps, CI/CD, Microsoft Azure, Azure Functions, Infrastructure as Code

Security Tooling, Monitoring & Testing: SonarQube (SAST), Harbor, Secret Sanitization, Grafana, Prometheus, Loki, JUnit, Mockito, Pytest, Selenium

AI Frameworks & Tools: LangChain, LlamaIndex, Ollama (Local LLMs), RAG Architecture, OpenAI API, n8n, Cursor, GitHub Copilot

Databases & Vector Databases: PostgreSQL, Qdrant, ChromaDB, Redis

Certifications: Certified Kubernetes Application Developer (CKAD), Azure Administrator Associate (AZ-104), Azure Fundamentals (AZ-900), Azure AI Fundamentals (AI-900)

Languages: German: A2 (in progress), English: Fluent

WORK EXPERIENCE

A.P. Moller Maersk | ***Bengaluru, India*** — Feb 2023 – Sep 2026

Platform Engineer, Internal Developer Platform (IDP) Team — Apr 2025 – Sep 2026

- Independently built two REST API platform integrations: service registration in the Maersk Application Catalog, and a GitHub integration for automated repository creation, custom properties and CI template setup
- Co-maintained MTTS, a data synchronization integration between Azure, GitHub and the organization's team space; operated and troubleshot Azure Kubernetes clusters using logs and monitoring
- Built Java/Spring Boot and Temporal workflows for deployment validation and service onboarding, supporting 8,000+ engineers
- Independently developed a Temporal-based deletion workflow within one month to remove service integrations and Kubernetes resources

Associate DevOps Engineer — Sep 2023 – Mar 2025

- Deployed, upgraded and maintained SonarQube (static code analysis) and Harbor in Kubernetes clusters; co-maintained CI/CD pipelines using Azure DevOps, GitHub Actions, Docker and Kubernetes
- Resolved 1,000+ L2/L3 incidents through log analysis, root-cause investigation and escalation; wrote Python automation scripts
- Followed team runbooks for incident handling and upgrades, and documented fixes, changes and known issues for hand-over
- Independently created an ARM-based GitHub self-hosted runner; contributed to the organization's migration from Azure DevOps to GitHub
- Received the SPOT Award; created and delivered bi-monthly onboarding sessions as a speaker

DevOps Engineer Intern — Feb 2023 – Sep 2023

- Assisted with CI/CD pipelines, deployments, monitoring checks and incident triage using Docker, Kubernetes and Azure DevOps

EDUCATION

M.Sc. in Web Engineering | **Technische Universität Chemnitz, Germany** — Oct 2026 – Present

B.E. in Electronics and Communication Engineering | **Visvesvaraya Technological University, India** — Aug 2019 – May 2023
(CGPA 8.42/10)

PROJECTS

- **LogLens: AI-Powered Log Diagnosis & Learning** | *Python, LangChain, Qdrant, Ollama, Local LLMs, Docker, GitHub Actions*
  Built an open-source log analysis tool with a LangChain/Qdrant RAG pipeline that identifies root causes in logs and sanitizes secrets locally
- **AI-Assisted GitHub Integration API** | *Java, Spring Boot, LangChain, GraphQL, REST, JSON*
  Built a backend service leveraging AI agent tooling to analyze developer activity metrics and automate repository governance
- **Campus Canteen** | *HTML, CSS, JavaScript, Azure Functions*
  Built a serverless web application for college canteen operations, with an HTML/CSS/JavaScript frontend and Azure Functions backend

COMMUNITY & TRAINING

Microsoft Learn Student Ambassador | ***Microsoft – Bengaluru, India*** — Aug 2021 – May 2024

- Advanced from Alpha to Beta milestone; conducted 15+ workshops on Java, web development and cloud; received the Best Mentor award

Digital Nurture 2.0 Certified Skill Development Trainee | ***Cognizant – Bengaluru, India*** — Mar 2022 – Jun 2022

- Completed Java and Spring Boot assignments focused on object-oriented design; received the Digital Tech Knight award
