Chemnitz, Germany

Summary

M.Sc. student in Web Engineering at TU Chemnitz with 3+ years of professional experience as a Platform and DevOps Engineer at A.P. Moller Maersk. Experienced in backend development using Java and Spring Boot, Kubernetes on Azure, and CI/CD automation, with internal platform tooling used by 8,000+ engineers. Resolved 1,000+ incidents. Experienced in production incident triage, technical mentoring, and onboarding new engineers; recognised with the SPOT Award from Maersk and a Best Mentor award from the Microsoft Student Ambassador program. Seeking a Working Student (Werkstudent) position in DevOps, Cloud or Backend Engineering, with a focus on platform engineering, Kubernetes, CI/CD automation, and Java/Spring Boot services, available up to 20 hours per week during the semester.

Education

Technische Universität Chemnitz — Chemnitz, Germany
M.Sc. Web Engineering — *Oct 2026 – Present*

Visvesvaraya Technological University (VTU) — Bengaluru, India
B.E. Electronics and Communication Engineering (CGPA: 8.42/10) — *Aug 2019 – May 2023*

Experience

A.P. Moller Maersk — Bengaluru, India | Feb 2023 – Sep 2026

Platform Engineer, Internal Developer Platform (IDP) team — *Apr 2025 – Sep 2026*

- Built backend workflows with Java, Spring Boot and Temporal for deployment validation and service onboarding, with internal platform tooling used by 8,000+ engineers.
- Independently developed a Temporal-based deletion workflow within one month to remove a service's integrations and associated data, including Kubernetes resource cleanup.
- Independently developed two platform integrations: the Maersk Application Catalog, which registers services, and a GitHub integration that automatically creates repositories, assigns custom properties, and configures CI from a template.
- Co-maintained MTTS, an integration that synchronises teams across Azure, GitHub, and the organisation's team space.
- Automated CI/CD pipeline scaffolding; operated and troubleshot Kubernetes clusters on Azure, including Helm and rollout debugging.

Associate DevOps Engineer — *Sep 2023 – Mar 2025*

- Co-maintained CI/CD pipelines using Azure DevOps, GitHub Actions, Docker and Kubernetes.
- Supported the deployment, upgrades, maintenance, and end-to-end operation of Harbor and SonarQube in Kubernetes clusters.
- Independently created an ARM-based GitHub self-hosted runner; with a teammate, migrated the organisation from Azure DevOps to GitHub.
- Resolved 1,000+ Level 2/3 incidents and received the SPOT Award; wrote Python automation scripts for operational tasks and integration testing; ran onboarding sessions twice a month for new joiners.

DevOps Engineer Intern — *Feb 2023 – Sep 2023*

- Assisted with CI/CD pipelines, deployments, monitoring checks and production incident triage using Docker, Kubernetes and Azure DevOps.

Microsoft — Bengaluru, India
Microsoft Learn Student Ambassador — *Aug 2021 – May 2024*

- Advanced from Alpha to Beta milestone; organised technical workshops on Java, web development, and cloud computing; completed hands-on Azure assignments; and received the Best Mentor award.

Cognizant — Bengaluru, India
Digital Nurture 2.0 Certified Skill Development Trainee — *Mar 2022 – Jun 2022*

- Completed Java and Spring Boot assignments focused on object-oriented design as part of the Digital Nurture 2.0 skill development programme; received the Digital Tech Knight award.

Projects

GitHub Integration API | *Java, Spring Boot, GraphQL, REST*

- Designed and built a backend service that aggregates data through GraphQL and REST APIs to visualize contributor activity and repository statistics.

Tokenisation of Real Estate | *Ethereum, MetaMask, IPFS*

- Developed a blockchain-based web platform for fractional ownership of real estate, using Ethereum for ownership records, MetaMask for wallet-based interaction and IPFS for decentralised storage.

Campus Canteen | *HTML, CSS, JavaScript, Azure Functions*

- Built a serverless web application for college canteen operations, with an HTML/CSS/JavaScript front end and Azure Functions backend.

Skills

Backend: Java, Spring Boot, REST APIs, Temporal, Kafka, PostgreSQL, Python (scripting and automation), HTML/CSS
Cloud & DevOps: Microsoft Azure, Docker, Kubernetes, Helm, Flux, Harbor, CI/CD, GitHub Actions, Azure DevOps, Git
Monitoring & Testing: Grafana, Prometheus, Loki, SonarQube, JUnit, Mockito, Pytest, Selenium
Tools & Methods: Linux, macOS, Jira, Confluence, Miro, Nexus, Sonar, Agile and Scrum

Certifications & Languages

Certifications: Certified Kubernetes Application Developer (CKAD); Azure Administrator (AZ-104); Azure AI Fundamentals (AI-900); Azure Fundamentals (AZ-900)
Languages: Kannada, English, Hindi, Telugu, German (A2, in progress)
