PROFESSIONAL SUMMARY

M.Sc. student in Web Engineering at TU Chemnitz with 3+ years of professional experience in DevOps and Platform Engineering at A.P. Moller Maersk. Experienced in Python, Bash, Java, Linux, Docker, Kubernetes, CI/CD, incident troubleshooting, REST API integrations, and operating security tooling like SonarQube (SAST) and Harbor. Adept at following runbooks, documenting changes, and handling handovers. Built an open-source LangChain/RAG log-diagnosis tool with local secret sanitization. Seeking a Working Student role in Security Tooling, DevOps, or Platform Engineering.

SKILLS

Scripting & Programming: Python, Bash, Git, Java, JavaScript, TypeScript, HTML, CSS

Systems & Tools: Linux Administration, Container Concepts, Incident Handling, Jira, Confluence, macOS

Integrations & APIs: REST APIs, API Integrations, Data Synchronization, GraphQL, Spring Boot, Temporal, Kafka

Cloud & DevOps: Docker, Kubernetes, Helm, Flux, Harbor, GitHub Actions, Azure DevOps, CI/CD, Microsoft Azure

Security Tooling & Monitoring: SonarQube (SAST), Harbor, Secret Sanitization, Grafana, Prometheus, Loki

AI Frameworks & Tools: LangChain, Ollama (Local LLMs), RAG Architecture, OpenAI API, n8n, GitHub Copilot

Certifications & Languages: Certified Kubernetes Application Developer (CKAD), AZ-104, AZ-900, AI-900; German: A2 (in progress), English: Fluent

WORK EXPERIENCE

A.P. Moller Maersk | ***Bengaluru, India*** — Feb 2023 – Sep 2026

Platform Engineer, Internal Developer Platform (IDP) Team — Apr 2025 – Sep 2026

- Built two REST API platform integrations: service registration in Application Catalog, and a GitHub integration for automated repository creation, custom properties, and CI templates
- Co-maintained MTTS data synchronization between Azure, GitHub, and team spaces; operated and troubleshot Azure Kubernetes clusters; built Spring Boot/Temporal workflows supporting 8,000+ engineers
- Developed a Temporal-based deletion workflow within one month to safely remove service integrations and K8s resources

Associate DevOps Engineer — Sep 2023 – Mar 2025

- Deployed, upgraded, and maintained SonarQube (SAST) and Harbor in K8s clusters; co-maintained CI/CD pipelines (Azure DevOps, GitHub Actions); resolved 1,000+ L2/L3 incidents through log analysis and Python scripts
- Followed runbooks, documented fixes and changes for handovers; created an ARM-based GitHub self-hosted runner and assisted in organization-wide migration from Azure DevOps to GitHub
- Awarded SPOT Award; delivered bi-monthly technical onboarding sessions as a speaker

DevOps Engineer Intern — Feb 2023 – Sep 2023

- Assisted with CI/CD pipelines, deployments, monitoring checks, and incident triage using Docker, Kubernetes, and Azure DevOps

EDUCATION

M.Sc. in Web Engineering | **Technische Universität Chemnitz, Germany** — Oct 2026 – Present

B.E. in Electronics and Communication Engineering | **Visvesvaraya Technological University, India** (CGPA 8.42/10) — Aug 2019 – May 2023

PROJECTS

- **LogLens: AI-Powered Log Diagnosis & Learning** | *Python, LangChain, Qdrant, Ollama, Local LLMs, Docker*
  Open-source log analysis tool with LangChain/Qdrant RAG pipeline that identifies root causes and sanitizes secrets locally.
- **Tokenisation Service Architecture** | *Java, Spring Boot, Security, REST APIs*
  Designed and structured tokenisation data flows for secure internal service integration and compliance.
- **AI-Assisted GitHub Integration API - Maersk** | *Java, Spring Boot, LangChain, GraphQL, REST*
  Backend service leveraging AI agent tooling to analyze developer activity metrics and automate repository governance.
- **Campus Canteen** | *HTML, CSS, JavaScript, Azure Functions*
  Serverless web application for college canteen operations, supporting social distancing during covid.

COMMUNITY & TRAINING

Microsoft Learn Student Ambassador | ***Microsoft – Bengaluru, India*** — Aug 2021 – May 2024

- Advanced to Beta milestone; conducted 15+ workshops on Java, web development, and cloud; received Best Mentor award
