PROFESSIONAL SUMMARY

M.Sc. student in Web Engineering at TU Chemnitz with 3+ years of professional experience as a Platform and DevOps Engineer at A.P. Moller Maersk. Skilled in Java/Spring Boot backend engineering, Kubernetes on Azure, CI/CD automation, and building LLM-driven AI workflows (LangChain, Ollama, RAG). Experienced in scaling internal platform tooling used by 8,000+ engineers. Recognized with the SPOT Award from Maersk and Best Mentor award from Microsoft Ambassador program. Certified in Azure (AZ-104, AZ-900, AI-900) and Kubernetes (CKAD). Seeking a Working Student position in Cloud, DevOps, AI, or Software Engineering.

SKILLS

Programming Languages: Java, Python (scripting and automation), JavaScript, TypeScript, HTML/CSS
Backend Frameworks: Spring Boot, REST APIs, GraphQL, Temporal, Kafka, FastAPI, Node.js
AI Frameworks & Tools: LangChain, LlamaIndex, Ollama (Local LLMs), RAG Architecture, OpenAI API, n8n, Cursor, GitHub Copilot
Databases & Vector DBs: PostgreSQL, Qdrant, ChromaDB, Redis
Cloud & DevOps: Microsoft Azure, Azure Functions, Docker, Kubernetes, Helm, Flux, Harbor, GitHub Actions, Azure DevOps, CI/CD, Git, Linux
Monitoring & Testing: Grafana, Prometheus, Loki, SonarQube, JUnit, Mockito, Pytest, Selenium
Tools & Certifications: Jira, Confluence, Agile/Scrum | CKAD, Azure Administrator (AZ-104), Azure Fundamentals (AZ-900), Azure AI (AI-900)
Languages: English: Fluent, **German**: A2 (in progress)

EXPERIENCE

A.P. Moller Maersk | ***Bengaluru – India*** Feb 2023 – Sep 2026

Platform Engineer, Internal Developer Platform (IDP) team Apr 2025 – Sep 2026

- Built backend workflows with Java, Spring Boot, and Temporal for deployment validation and service onboarding, used by 8,000+ engineers.
- Independently developed a Temporal-based deletion workflow within one month to remove service integrations and Kubernetes resources.
- Developed Maersk Application Catalog and a GitHub integration service for automated repo creation and CI template configuration.
- Co-maintained MTTS synchronization integration across Azure, GitHub, and team spaces; operated and troubleshot Azure K8s clusters.

Associate DevOps Engineer Sep 2023 – Mar 2025

- Co-maintained CI/CD pipelines using Azure DevOps, GitHub Actions, Docker, and Kubernetes; operated Harbor and SonarQube in K8s clusters.
- Independently created ARM-based GitHub self-hosted runner; contributed to migrating the organization from Azure DevOps to GitHub.
- Resolved 1,000+ Level 2/3 incidents, received SPOT Award, wrote Python automation scripts, and ran bi-monthly onboarding sessions.

DevOps Engineer Intern Feb 2023 – Sep 2023

- Assisted with CI/CD pipelines, deployments, monitoring checks, and production incident triage using Docker, Kubernetes, and Azure DevOps.

Microsoft Learn Student Ambassador | ***Microsoft – India*** Aug 2021 – May 2024

- Advanced from Alpha to Beta milestone; organized technical workshops on Java, web development, and cloud computing; received Best Mentor award.

Digital Nurture 2.0 Certified Skill Development Trainee | ***Cognizant – India*** Mar 2022 – Jun 2022

- Completed Java and Spring Boot assignments on object-oriented design; received Digital Tech Knight award.

EDUCATION

M.Sc. in Web Engineering | **Technische Universität Chemnitz, Germany** Oct 2026 – Present
B.E. in Electronics and Communication Engineering | **Visvesvaraya Technological University, India** (CGPA: 8.42/10) Aug 2019 – May 2023

PROJECTS

- **LogLens: AI-Powered Log Diagnosis & Learning** | *LangChain, Qdrant, Ollama, Local LLMs, Docker, GitHub Actions* — Developed an open-source log analysis tool with RAG pipeline via LangChain and Qdrant vector database to identify root causes and sanitize secrets locally.
- **AI-Assisted GitHub Integration API** | *Java, Spring Boot, LangChain, GraphQL, REST* — Built backend service leveraging AI agent tooling to analyze developer activity metrics and automate repository governance.
- **Campus Canteen** | *HTML, CSS, JavaScript, Azure Functions* — Built serverless web application for college canteen operations with HTML/CSS/JS frontend and Azure Functions backend.
- **Tokenisation of Real Estate** | *Ethereum, MetaMask, IPFS* — Developed a blockchain platform for fractional ownership of real estate using Ethereum, MetaMask wallet integration, and IPFS storage.
